

# Privacy Policy

---

Last updated: May 18, 2026

## Data We Use

### Account & Device

We store a device identifier and limited account information (such as your Apple Sign In email) to provide core app functionality, including saving your data and maintaining your account.

---

### Processing

Ingredient and food analysis is performed automatically. Results are generated by algorithms and may not always be perfectly accurate.

To provide these features, some data (such as images or extracted text) may be processed by trusted third-party services (e.g., OpenAI) strictly for the purpose of generating results.

This data is processed transiently and is not used to identify you.

---

### Analytics

We use analytics services (such as Firebase Analytics) to understand how the app is used and to improve features, stability, and performance.

Analytics may collect limited technical and usage information, such as:

- app interactions and feature usage
- device type and operating system
- app version
- crash and performance data
- approximate region or country

This information is aggregated and does not directly identify you.

We do not use analytics data for advertising personalization or sell analytics data to third parties.

Some analytics data may be processed by trusted service providers (such as Google Firebase) according to their own privacy policies.

---

## Images

Images you take or upload are used only to perform analysis.

- Images are not stored on our servers
  - Images shown in the “Log” section are stored only on your device
  - Images may be temporarily transmitted to third-party services for processing
  - No human reviews your images
- 

## What We Don't Collect

### Location

We do not collect or store your precise location data.

Location-related information (such as country or region) may be inferred by the system only to improve analysis quality, but it is not stored or tracked.

---

## Data Sharing

### No Selling of Data

We do not sell your personal data.

We do not share your personal data with third parties for advertising or marketing purposes, and we do not use third-party advertising SDKs for personalized ads.

We only transmit the minimum necessary data to trusted service providers to perform core functionality (such as AI-based analysis).

---

## Data Retention

We do not store your images or analysis data on our servers.

Any data processed by third-party services is handled according to their privacy policies and is not retained by us beyond what is necessary to provide the service.

---

## Contact

### Support
